

**ASIC**

Australian Securities & Investments Commission

**EDGE**

**ELECTRONIC LODGEMENT SYSTEM**

**DOCUMENTATION SUMMARY**

**Version 5.00**

**27 January 2016**

## **Notice To Readers**

This specification is current at the latest date shown in the Amendment Record, but it may be amended at any time without prior notice. Only developers of packages currently registered for the Electronic Company Registrations component of EDGE lodgement will be notified of changes.

ASIC is not responsible for the quality or merchantability of software developed on the basis of this specification, nor is it responsible for any application packages developed by third parties to prepare and lodge documents onto the EDGE system. ASIC does not support such software in any form.

## **NOTICE – X.25 Shutdown**

### **X.25 SHUTDOWN**

Only the TCP/IP transport layer is available for lodgement after 1 July 2006.

Historical references to X.25, ZModem, Kermit and DIS have been retained in the specification documents as background for developers who need to understand the application control protocol defined in Internet\_acpspec.doc.

# 1. INTRODUCTION

## 1.1. Who should read this document

This document is written for persons developing software which creates electronic documents intended for transmission to ASIC's EDGE system.

This document may be of interest to persons investigating problems with such software, persons using such software and persons developing other Corporations Law related software.

## 1.2. The purpose of this document

This document provides a list of the publicly available documentation of ASIC's EDGE electronic lodgment system.

## 1.3. EDGE documentation

EDGE specifications are available for download from "<http://www.asic.gov.au/api>".

General details of the EDGE messages are described in:

- EDGE Messages Specifications (version 5.00 of 8 August 2008)

Details of other types of messages that can be lodged through EDGE are described in:

- EDGE Registry Messages Specifications (version 5.00 of 17 May 2012)
- EDGE Agent Services Messages Specifications (version 5.00 of 8 August 2008)
- EDGE Company Registration Messages Specification (version 2.10 of 17 May 2012)
- EDGE ASIC Generated Messages Specifications (version 1.10 of 8 August 2008)

Requirements for digital signatures for message and agent authentication are described in:

- EDGE Digital Signature Specification (version 1.02 of 27<sup>th</sup> February 2004)

Successful lodgment to EDGE requires compliance with:

- EDGE Document Interchange System Interface Specifications (version 1.07 of 14 April 2003)

- EDGE Internet Transport Layer Application Communication Protocol (version 1.03 of 27 January 2016)

Software producers should also be aware of the terms and conditions set out in the:

- ASIC Electronic Lodgement Protocol and Application for EDGE Participation

Procedures for transmission and correction of electronic document files are described in:

- EDGE Reference Guide, ASIC

ASIC may prepare other specifications and directions from time to time. They will be distributed to registered software developers.

## **1.4. Where to get help**

# Appendix A - Amendment History

## **Version 03.00**

Released to software suppliers 30th June 1998.

## **Version 3.01**

Released to software developers 4th September 1998

## **Version 3.02**

Released to software developers 9th October 1998

## **Version 3.10**

Released to software developers 17th January 2000

## **Version 3.20**

Released to software developers 17 January 2001

## **Version 4.00**

Released to software developers as a draft 31 December 2002

Next draft released to software developers 3 February 2003 – release dates amended

Next draft released to software developers 10 March 2003 – release dates amended

Final version released 1 July 2003

## **Version 4.01**

Released to software developers on 9 September 2003

Consolidates amendments from Change Sheets 1 and 2

## **Version 4.02**

Released to software developers on 14 May 2007

Consolidates amendments from Change Sheets 3 to 8

## **Version 5.00**

Released to software developers on 8 August 2008
